Education

Masters in Software Development and Business Information Systems *Oct 2025 - present*
Faculty of Economics and Business Administration

Faculty of Computer Science Iasi *Oct 2021 – July 2025*
"Alexandru Ioan Cuza" University

Experience

Junior Java Developer *Sep 2025 – present*
Endava

Business Sales Advisor *Feb 2025 – Sep 2025*
Vodafone

Brand Ambassador *June 2024 – Feb 2025*
Mercury360

Software Engineer Intern *July 2023 – Sept 2023*
Continental Automotive Iasi

Mathematics and Computer Science Teacher *Dec 2021 – June 2024*
Matematica.md

Technologies

Languages: C++, C, Java, JavaScript, TypeScript, Python, PHP, HTML, CSS
Frameworks & Libraries: SpringBoot, React.js, React Native, Node.js, Express
Databases: SQL, MongoDB, Oracle Database, PostgreSQL
Tools: Git, GitHub, GitLab

Projects

Interview Management – Recruiter Support Web Application *github*

- Built a web application for recruiters to schedule and manage interviews, assign tests and questions, and evaluate candidates through automated score calculation based on interview performance.
- Tools Used: Java 21, Spring Boot, HTML, CSS, JavaScript, JPA, REST API

iNeed - Mental Wellness & Habit Tracking App *demo*

- Developed a mobile app that helps users monitor and improve their basic needs (e.g., sleep, hygiene, social interaction) through real-time feedback, Google Fit integration, and gamified interactions like mini-games and social chat.
- Tools Used: React Native, Node.js, Express, MongoDB, Google Fit Api, Socket.io, REST API, Ngrok, TypeScript, JavaScript

Web Gardening – Interactive Gardening Web App *github*

- Designed and implemented a web-based gardening simulator allowing users to manage virtual plants and track their growth over time.
- Tools Used: Java, HTML, CSS, JavaScript

Bubble Buster – Arcade Game *github*

- Created a game that simulates the classic Bubble Shooter mechanics.

- Tools Used: Python, Pygame

Electronic Circuit Viewer *demo*

- Built a web application in C, that allows users to interactively view and explore electronic circuits and their components.

Escape Room Game

- Worked in a small team to create a 3D escape room game in Unreal Engine 5, contributing to level design, interactive logic via Blueprints, and collaboration through shared tasks and regular feedback.
- Tools Used: Unreal Engine 5, Blueprints, 3D Modeling
